PROFESSIONAL SUMMARY

Back-end Developer at e& with hands-on experience building and shipping production web applications. Comfortable across the stack with React, Node.js, and MongoDB, with a focus on writing services that stay reliable as they scale. Currently deepening my work in cloud infrastructure, and drawn to teams solving real problems in fast-moving environments.

EDUCATION

United Arab Emirates University

Bachelor of Science - Computer Science (12/2024)

- Excellent Academic Standing
- CGPA for Fall of 2024 in BSc CS 3.08/4.0
- Winner of the 2022 programming contest

EXPERIENCE

Back-end Developer | e& (Sep 2025 - Present)

Programming Intern | Dubai Police (Aug 2024 – Dec 2024)

- Took part in developing internal web applications
- Successfully presented and showcased key projects to senior professionals and important figures, demonstrating confidence, clarity, and strong technical understanding.
- Contributed valuable insights that influenced and improved the team's development process, leading to more efficient workflows and better project outcomes.
- Hosted internal web and app solutions, ensuring reliability, ease of access, and smooth deployment for team-wide use.

PROJECTS

Senior Project: Smart Gym Solution

- Developed a cross-platform iOS/Android application to enhance the gym experience for users.
- Built and deployed a RESTful API to handle user data, workout sessions, and smart device communication.
- Designed and managed a backend database to store and process user statistics and session data.
- Engineered a smart gate using Arduino components, integrated with the app for automated access control.
- Collected real-time user data to generate insightful workout statistics and progress tracking.

CERTIFICATIONS

- IBM – AI for Everyone
- Cisco – Cybersecurity Essentials course
- Cisco - CCNA Routing and switching course
- AlTaif - Electronic Assistant Technician
- IELTS (7.0)
